SMART CURTAINS: YOUR COZINESS AND COMFORT

OUR WHISPER-QUIET CURTAINS

**TAKE THE SUN
UNDER YOUR CONTROL**

**INTELLIGENT AUTOMATION
OF ALL TYPES OF CURTAINS**

WALL PANEL – A RELIABLE METHOD OF CONTROL

IT ALWAYS REMAINS IN ITS USUAL PLACE,
AND YOU WON'T HAVE TO LOOK FOR IT

The wall radio panel can be installed anywhere. Ideal for those who constantly lose their remotes. The button interface is user-friendly. This control method is available to each and every user. Supplied complete with the set.

FAMILIAR. CLEAR. CONVENIENT.

REMOTE CONTROL

Even the most conservative family members will find a comfortable method of control. Open and close curtains with a button remote. Extremely clear, familiar and convenient. Supplied complete with the set.

Possibility of completing with additional multifunctional remotes and wall panels.

MANUAL CONTROL

MANUAL MECHANICAL CONTROL REMAINS
AVAILABLE IN ANY SITUATION

Gently pull the curtain in the desired direction, just demonstrating the movement, and the electric motor will complete the action for you.

The electric curtain rail is equipped with a motor unlocking system, and even if the light is turned off, the curtains can be opened and closed manually.

EVEN MORE POSSIBILITIES WITH THE MOBILE APP

Connecting a smart electric curtain rail to a mobile app will open up even more possibilities. You will be able to control the curtains both locally and from anywhere in the world. Control the curtains in one go: decide according to the situation when and to what extent to open or close the curtains. Create instant one-click scenes: open 20%, close 50%, etc.

You can program various scenes to suit your pace of living: by timer, by schedule, using astronomical data, PIR and LUX sensors, and much more. For example, you can set the curtains to close immediately after sunset, or to open 5 minutes before the alarm goes off.

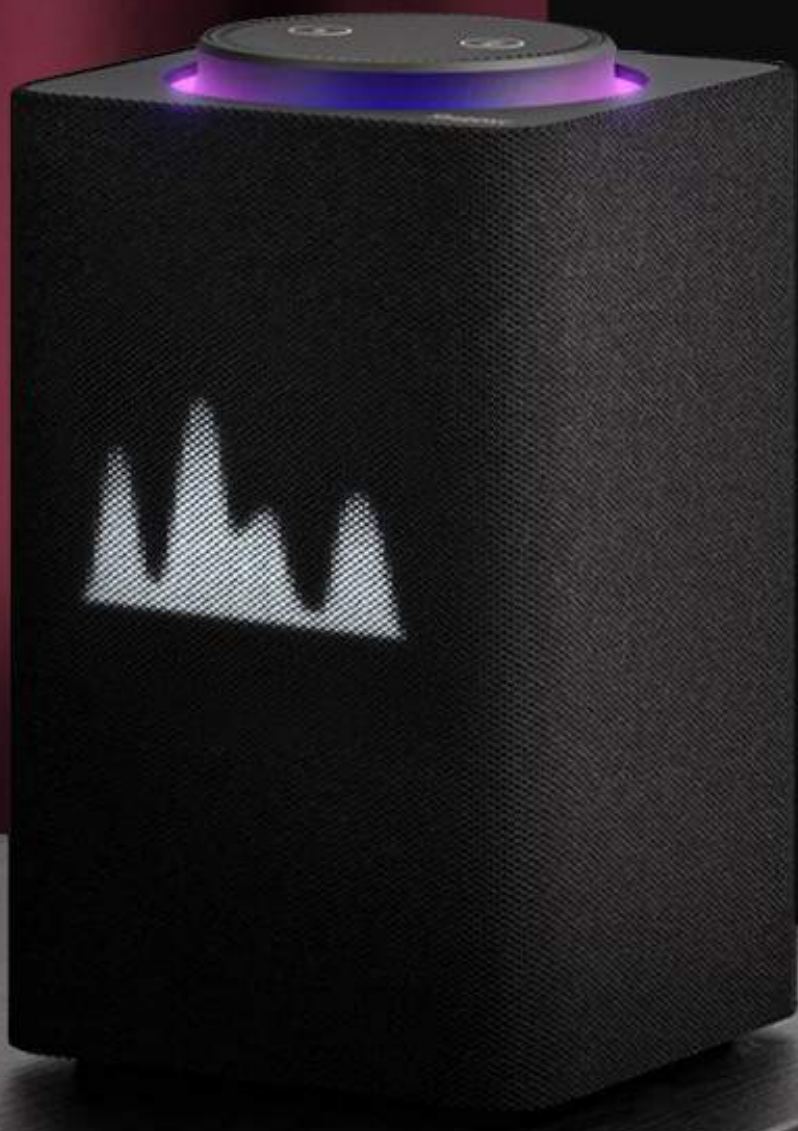

«ALICE, OPEN THE CURTAINS!»

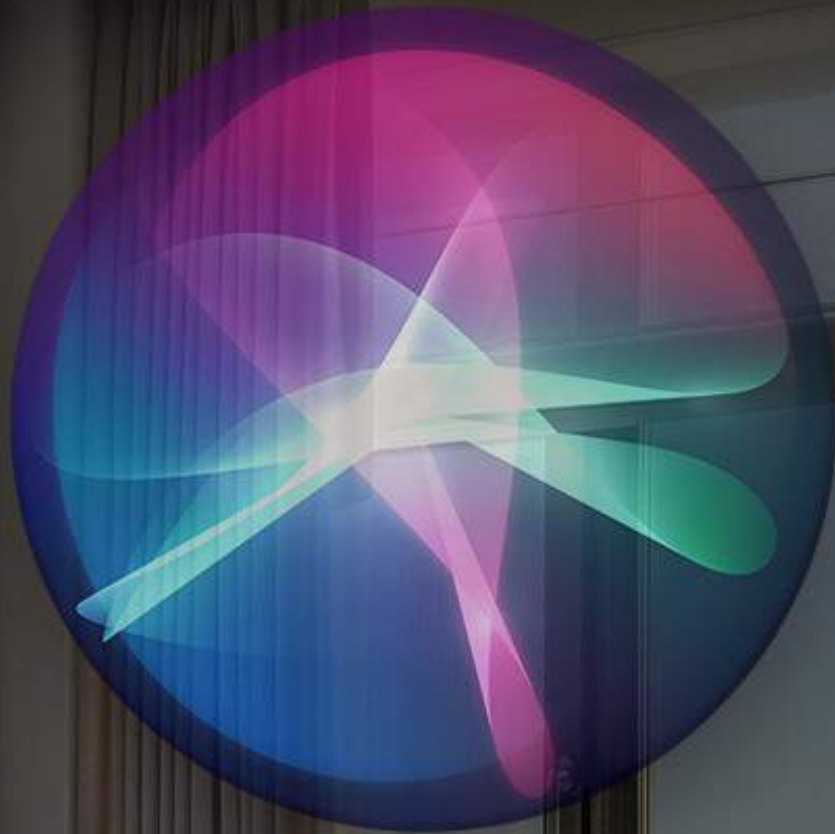

Alice is always on! Ask Alice to close or open the curtains – and she will easily fulfill your request.

Alice understands you, and the smart electric curtain rail understands Alice. Complete mutual understanding.

The Yandex mobile app supports the creation of automation scenes and programs.

REMOTE VOICE CONTROL WITH SIRI

Smart electric curtain rails are friendly with the Siri voice assistant, which means that you can control the curtains with your voice. Voice control is always available when you have your smartphone and Siri with you. Give voice commands to open or close the curtains, even when you are away from home. Siri will control the process.

SMART SPEAKER GOOGLE HOME

If you prefer the GOOGLE HOME home assistant, there will be no problems either. The smart electric curtain rail will easily find a common language with GOOGLE ASSISTANT, too.

SIMPLE CONTROL WITH ALEXA

A smart speaker ALEXA has settled in your house. Use this opportunity to control the curtains with your voice. You do not need to get up, look for a remote control or phone, reach for a button.

Just say: «ALEXA, open the curtains!»
or «ALEXA, close the curtains 40%».

amazon

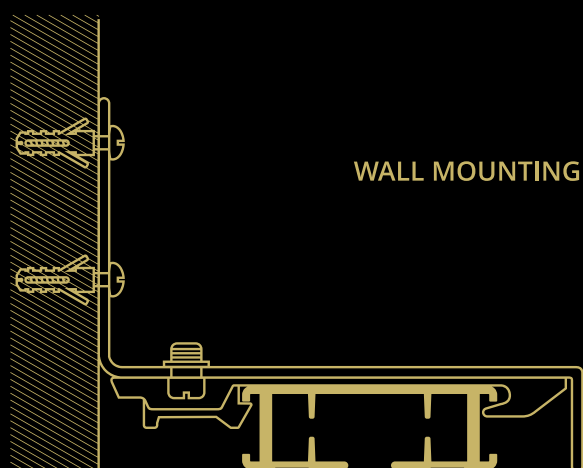

EXTREMELY EASY ASSEMBLY

The assembly of the electric curtain rail will not take long. Anyone can handle it. The set includes everything you need for assembly and installation: guide tracks and connectors for them, an electric drive, side plugs, rollers, a toothed drive belt, fasteners, clamps, and clear step-by-step instructions that leave no room for assembly errors.

UNIVERSAL MOUNTING

Install the electric curtain rail, based on your possibilities and preferences. The set includes two types of fasteners – for the wall mounting or the ceiling mounting. Whichever option you choose, you will not have to purchase additional accessories.

POWERFUL AND SILENT MOTOR

POWERFUL MOTOR EASILY COPES WITH
ANY CURTAIN FABRICS UP TO 40 KG

You can use light tulle, thick curtains or drapes, blackout curtains. You are free in your choice. The electric motor will ensure fast, smooth and quiet movement of the curtain fabric along the guides. The noise level of the motor is only 10-15 dB, which is not perceived by human hearing.

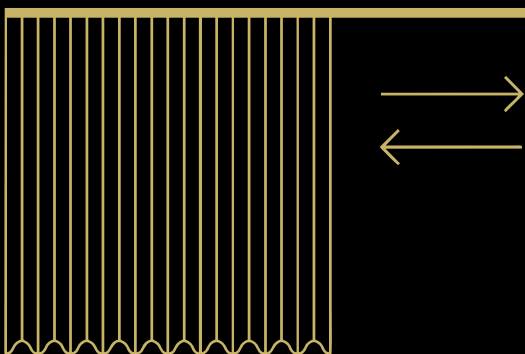

During operation, the noise level of correctly mounted curtains, depending on the fabric and mounting surface, does not exceed 30-35 dB, which is comparable in volume to a quiet whisper of a person. They can be installed in bedrooms and children's rooms.

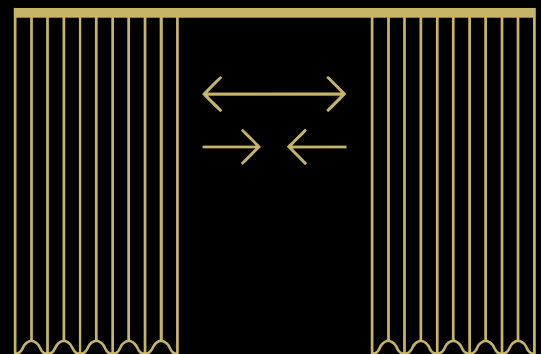

CHOOSE YOUR OPENING OPTION

The universal mechanism allows you to choose the direction of the fabric movement that is comfortable for you: from the center to the sides or from side to side in any direction.

FROM SIDE TO SIDE

FROM SIDES TO CENTER

IDEAL FOR ROOMS WITH HIGH CEILINGS

The electric curtain rail is ideal for rooms with high ceilings, as it is controlled automatically. It is no longer necessary to make efforts or use improvised means to move heavy curtains along high-positioned guides. You can forget about uncomfortable curtain wands, torn off hooks and «captured» curtain edges.

FOR ANY TYPE OF WINDOWS

ASSEMBLE THE CURTAIN RAIL OF ANY CONFIGURATION,
INCLUDING CORNER AND BAY WINDOWS

The set of guides is universal and suitable for any windows. The modular track system and 90° and 135° angle connectors (sold separately) make it possible to assemble even complex curved structures for panoramic, corner and bay windows.

SUITABLE FOR ANY WINDOW SIZE

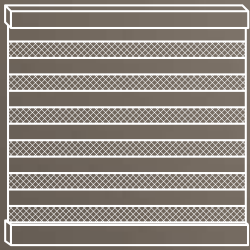

The modular system makes it possible to adjust the length of the finished structure to any width of the window opening in increments of 12.5 mm. The need to cut tracks is reduced to zero.

Adjustment of the final length of the cornice is carried out by choosing tracks of different sizes, using straight or angle lock brackets. The range includes models of curtain rails with a maximum length of guides up to 8,200 mm.

CREATE YOUR WORLD! EXAMPLES OF POPULAR SCENES

MORNING

EVERY MORNING WILL BE GOOD.
«GOOD MORNING» SMART HOME SCENE

Smart curtains are easily integrated into the Smart Home. Use the electric curtain rail in popular automatic scenes. For example, the «Good Morning» scene can be set up as follows: at the set time, the curtains are opened, your favorite music and the coffee maker in the kitchen are quietly turned on. No chance to wake up in a bad mood.

CINEMA

PREPARE THE ROOM FOR MOVIE SHOW WITH ONE COMMAND
«CINEMA» SMART HOME SCENE

Use smart electric curtain rails as part of the «Cinema» smart home scene. Prepare the perfect cinema hall with just one command in the mobile app or by voice. At your command, the curtains will close, the lights will dim, special lighting and a home theater will turn on.

DAYTIME

STAY FOCUSED ON MAIN THINGS.

COMFORT IS IN DETAILS «DAYTIME» SMART HOME SCENE

A properly configured «Daytime» scene will allow you not to be distracted by everyday trifles from important things. Create an optimal light space for yourself and your loved ones in automation mode. For example, close the curtains halfway during the peak of solar activity, close them during the children's daytime naps, open them to create an invigorating atmosphere during working hours. Everything is possible with smart electric curtain rails.

GOOD NIGHT

ENJOY YOUR RIGHT TO PRIVACY
«GOOD NIGHT» SMART HOME SCENE

Smart electric curtain rails are a mere must-have in the «Good Night» smart home scene. As the dusk falls, the lights in the room will automatically turn on and the curtains will close. This way you will avoid the «aquarium» effect, when everything that happens at home can be seen from the street, as if in a brightly lit shop window.

Enjoy comfort in automated mode.

Smart curtain rail for sliding curtains

WIFI or ZIGBEE

- Alice, Siri, Google Home voice control.
- Free Smart Life app for iOS and Android.
- Wall panel and portable remote control.
- Flexible length adjustment.
- Opening from center to sides or from side to side.

INFORMATION ABOUT THE DEVICE

Rated torque:	1.2 Nm
Motor noise level:	10-15 dB
Maximum load:	40 kg
Remote control range:	< 50 m
Rated power:	40 W
Supply voltage:	100-240 V AC 50/60 Hz
Ingress protection:	IP20
Warranty:	3 years

LENGTH OPTIONS

Length of the set	2.2 m	3.2 m	4.2 m	5.2 m	6.2 m	7.2 m	8.2 m
Adjustment	< 2.20 m	2.20-3.20 m	3.20-4.20 m	4.20-5.20 m	5.20-6.20 m	6.20-7.20 m	7.20-8.20 m
